

Smart Water Prevention

Better Protection Against Water Damage

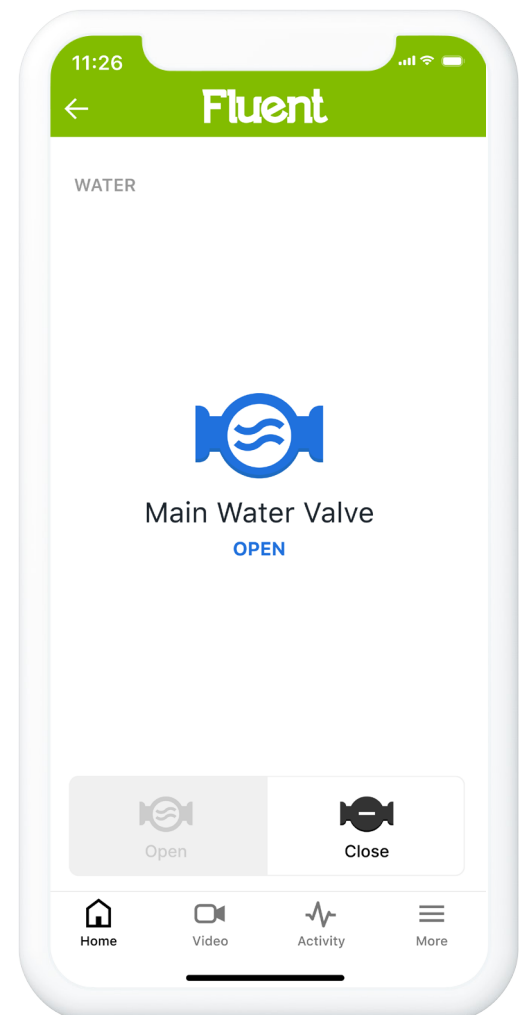

Water damage accounts for more than 50% of home insurance claims, but in many cases, the damage can be avoided. To help your clients stay protected, Fluent, in partnership with Intact Insurance, offers state-of-the-art security products, including Smart Water Prevention.

FLUENT SMART WATER PREVENTION

Not only will your customers be protected against the risk of damage caused by flooding, they will also benefit from a preferential rate for installation and monthly costs, in addition to applicable discounts on their insurance premium.

Fluent Smart Water Prevention provides two ways to actively prevent flooding:

1. When clients arm the security system, Fluent's water valve will automatically shut off after a delay. Fluent's water valve will re-open when the security system is disarmed.
2. When one of our water sensors detect a water leak, the water valve will automatically shut off.

Best offer in the market for intact customers with the most advanced technology.
